

COSA

Periods of waiting can be a welcome break in our often hectic working day. A means to recuperate. Recharge the batteries. Get ready for the next task. Which works best of all in an environment that is peaceful and inspiring. This is why we have developed the Cosa chair. Perfect in reception areas, hotel lobbies, conference rooms or cafés. It makes waiting anywhere more comfortable.

The curvilinear backrest, which frames the seat cushion at the side, is Cosa's distinguishing feature. The slender four-leg steel frame is in stark contrast to the massiveness of the seat shell. The seat and backrest are made of memory foam sections, covered with fleece and high-grade materials, e.g. comfort micro fibre or aniline leather. The light flexing of the backrest further increases the comfort. Cosa is also available in a swivel chair version.

DANIEL FIGUEROA

When Daniel Figueroa designed Cosa, he wanted to make a chair to help people replenish their resources during hectic days on the road. A generously rounded back combined with sleek legs gives Cosa a special character, while the stylish design and the large selection of colours makes it work in all environments.

“A generously rounded back combined with sleek legs gives Cosa a special character.”
